SETUP STEPS

01

CONNECT TO TV

- Connect the High Speed HDMI Cable to the appropriate HDMI port on the Roku device.

- Connect the other end of the High Speed HDMI Cable to the appropriate HDMI port on your TV.

02

CONNECT TO POWER

- Connect the USB power cable to the appropriate port on the Roku device and connect to the USB port on your TV.
 - If you have Kits, #4-8, connect the other end of the USB Power Cable with Wireless Receiver into the Extender Cable and connect to the USB port on your TV.
 - For a better experience, plug the USB power cable into the power adaptor, plug in to a wall outlet and then connect the other end to the Roku player.

03

POSITION ROKU STREAMING PLAYER

- The Roku device must be positioned to face the Roku remote.

04

POWER ON TV AND SELECT INPUT

- Use your TV remote to power on your TV and select the input you used to connect your streaming player.

- Once in Settings, navigate to Network & Set Up Connection and select Wireless. A list of available WiFi Networks will appear, your own WiFi Network being among them! You want to select this, then enter your password.
